Monthly Rate Change - November 2018

Map based on average of Start Station Longitude and average of Start Station Latitude. Color shows details about Index. Size shows details about Start Station Name. The marks are labeled by Start Station Name. The data is filtered on Exclusions (Start Station Latitude, Start Station Longitude, Start Station Name), which keeps 927 members. The view is filtered on Index, which keeps 10 members.

1. Monthly Analysis

The first part of the analysis is presenting the time variation variation taking into account:

- Usage of bikes per month and the consecutive monthly variation
- Hourly breakdown of usage for Summer and Winter season..

2. Operational Analysis

This part of the analysis included different population characteristics.

- Monthly usage of Bikes for each hender and the consecutive rate change per month.
- Trip duration time for every different age. Due to the fact that there were some outliers the Median value is also represented in the graph with a line chart

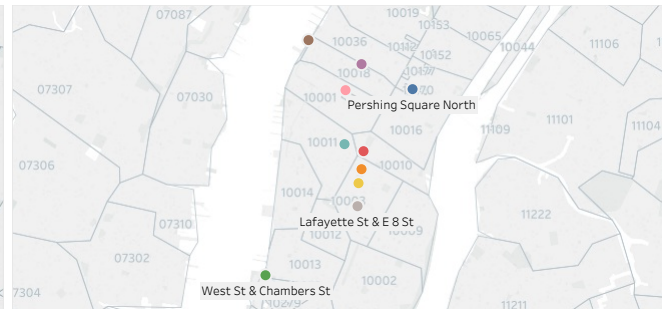

Geographical Analysis

This Plot presents the Top 10 and Bottom 10 Stations for Beginning or Ending the trip.
- Busiest stations are found at Manhattan
- Lower traffic stations are on areas outside of Manhattan
